OBJECTIVE

Software Developer with a strong foundation in **Backend Development**, **Data Structures & Algorithms**, and **System Design (LLD & HLD)**. Experienced in building **full-stack and backend-focused projects** using modern technologies, with a focus on writing **scalable and efficient applications**. Eager to apply strong **problem-solving**, **Debugging** and **Quick Learner** software engineering skills to build impactful real-world products.

SKILLS

Programming Languages: C++, JavaScript, TypeScript.
Frontend Technologies: HTML, CSS, React, Tailwind CSS.
Backend Technologies: Node.js, Express.js, REST APIs, Authentication (JWT), Middleware, WebSockets, API Validation, Error Handling, Server-side Logic.
Databases : MySQL, PostgreSQL, MongoDB, CognitoDB.
DevOps & Infrastructure: Docker, Apache Kafka, Kubernetes.
Core Computer Science: DSA, OOP, DBMS, Operating Systems, Computer Networks.
Tools & Platforms: Git, GitHub, Postman, npm, MS Office, VS Code.

PROJECTS

Live DSA Practice & Contest Platform (Self Project, Ongoing). Oct 2025 – Present
Built a full-stack web platform inspired by **LeetCode contests** where users can log in, create or join live **DSA problem rooms**, set contest duration, and solve problems simultaneously. Implemented frontend using **React, JavaScript**, and **Tailwind CSS**, and backend using **Node.js, Express.js** and **MongoDB** for authentication, contest and submission management. ([Live Site](#)) ([GitHub](#))

Shreeji Enterprises Website (Freelance Project) Nov 2025 – Dec 2025
Developed and deployed a **responsive business website** for a solar and electrical services company using **React, TypeScript**, and **Tailwind CSS**. Implemented **service pages** and a **contact form** with basic backend form data handling. ([Live Site](#)) ([GitHub](#))

CognitoDB Graph Database Benchmark (Self Project) Aug 2026 – Sep 2026
Built a **graph database benchmarking pipeline** using **Node.js, JavaScript**, **Cypher**, and **Neo4j Driver**, processing **91K+ nodes** and **200K relationships**. Implemented **batched ingestion**, **indexing**, **retry/resume support**, and **automated benchmark execution**, and evaluated query performance using **graph traversals** and **P50/P95 latency analysis**. ([GitHub](#))

EXPERIENCE

Developed **real-world freelance and self-initiated projects** across **backend and full-stack development**, working with **Node.js, Express.js, React, JavaScript, TypeScript**, and **databases**, build **REST API**.

Applied **C++**, **Data structure & Algorithms** to implement (**Persistent Priority Queue Data Structures**), **debugging**, and **System Design** to build **efficient, scalable, and maintainable software solutions**.

EXTRA-CURRICULAR ACTIVITIES

- Practiced **Data Structures & Algorithms** daily with **1200+ problems** on **LeetCode** and **650 +** on **GeeksforGeeks**; participated in weekend coding contests, completed **GFG160 challenge**.
- Explored **Generative AI** concepts and used **AI tools** such as **ChatGPT** and other **GenAI tools**.
- Shared **technical learnings and progress** through regular posts on **Twitter** and **Linkedin**.

Profiles: [LeetCode](#) | [GeeksforGeeks](#)

EDUCATION

Bachelor of Science in Computer Science, Chaudhary Charan Singh University, Meerut College, Meerut.
Percentage: 78% — **CGPA:** 7.8/ 10 **2023 – 2026**
